

W. N. T. C.

This is the seventh and perhaps most successful year since W.N.T.C. started operating on our campus. The campus radio station is an independent, self-supporting organization which shows its personnel, totaling seventy-five, from both Clarkson and S.U.N.Y.P. The purpose is to bring to the entertainment as possible to its student listening audience.

A most popular feature with the students has been the station's policy of broadcasting as many athletic contests as possible. Supplementing this year by a new and more powerful transmitter, W.N.T.C. expects to improve the technique and quality of its productions for its ever increasing listening radio audience. In addition, the new transmitter is expected to enable the station to transmit more student dramatic productions than ever before.

Operating of the radio station requires a large staff of technicians and others proficient in programming, engineering, publicity, and business, which gives the organization the opportunity of bringing together men of different departments and to provide fellowship and mutual respect.

Billy Bruckner
Station Manager
